

Quality of Care

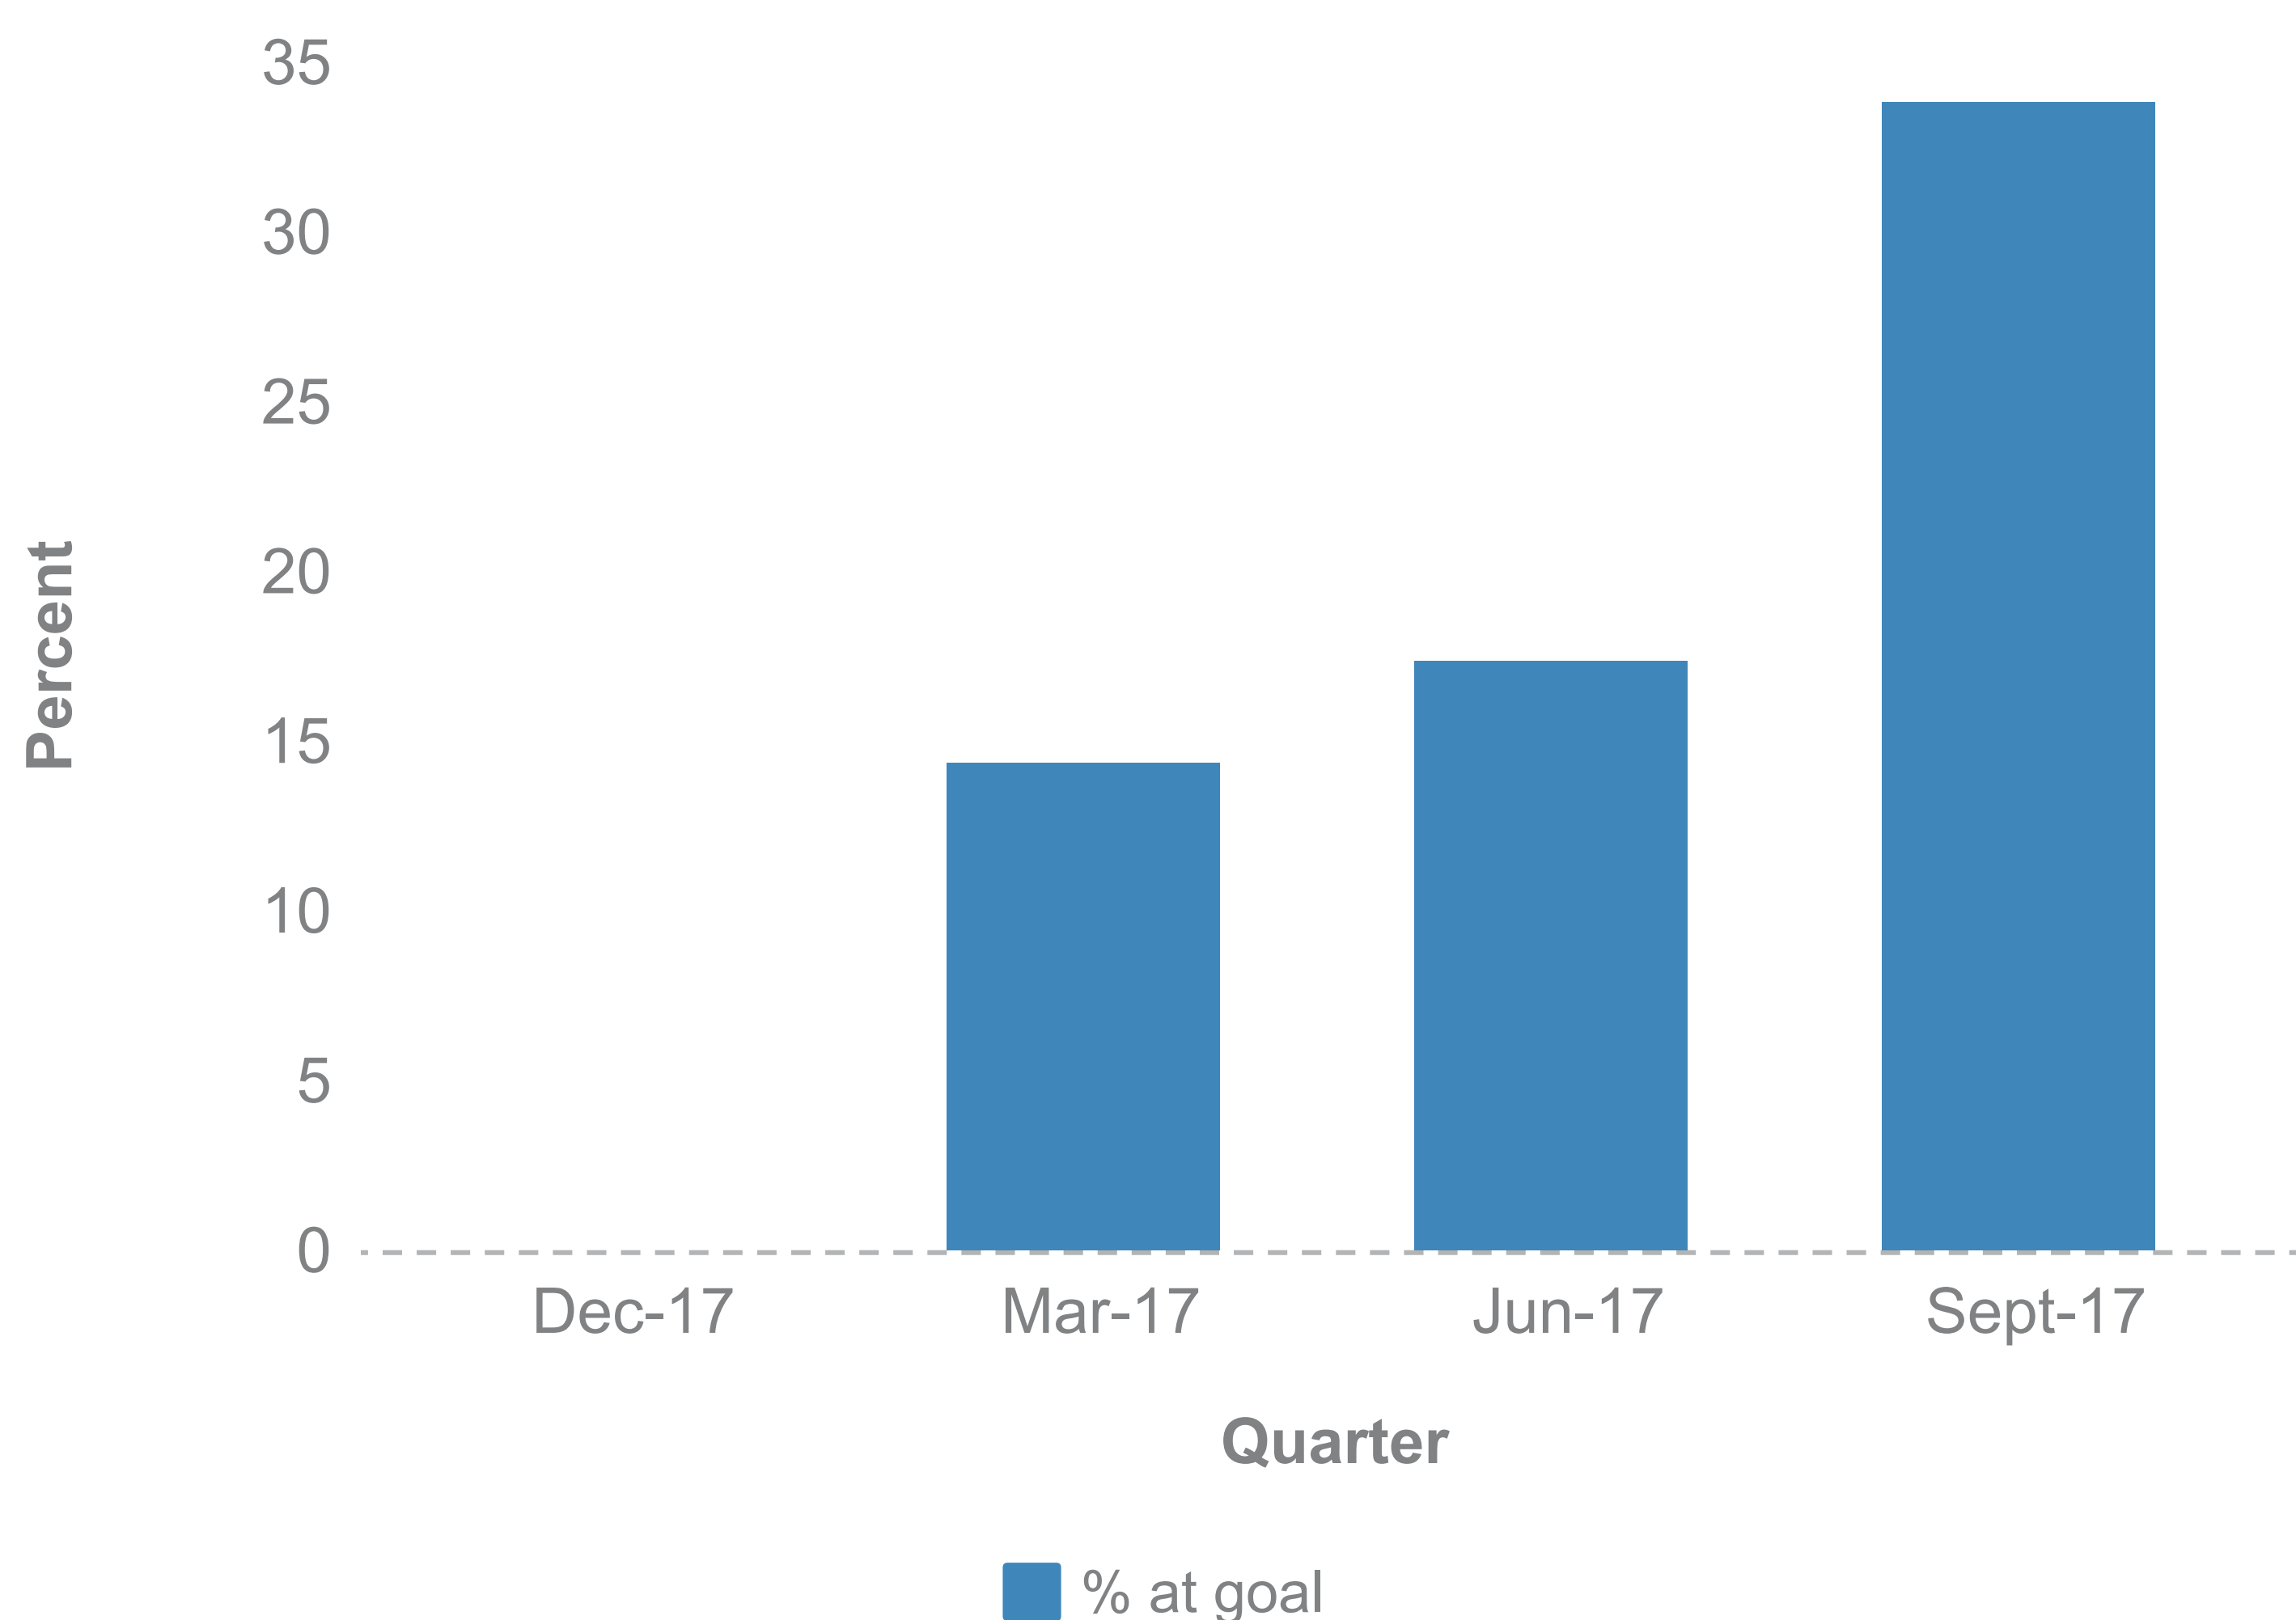

Cervical Cancer Screening

Salina Family Healthcare Center
October 2017

Cervical Cancer Screening

The Facts

- The human papillomavirus (HPV) is the main cause of cervical cancer
- Regular screening helps find cervical cancer early
- When cervical cancer is found early, chances of being cured are high
- Recommended to have regular screenings starting at age 21

Improvement Plan

Audit new health record and ensure accuracy of data

Provide quarterly audit and feedback
